Work Experience

LEAA A.C. - UX Designer & Software Engineer

Jul 2020 - Now | Mexico City

- Designed and developed the app Moviteca, an app that wants to encourage reading and culture.
- Developed the WordPress theme for the website Colectiva, a project that shows the results of the association's programs with people in vulnerable situations.
- Increased books sells by redesigning and developing the website Creando Lectores.

Musicat - Front End Developer

Oct 2019 - Nov 2020 | Mexico City

- Worked with musicians and historians to develop websites that show the result of years of investigation about the cathedrals of Mexico.
- Increased the traffic of the websites by redesigning and improving their development.
- Improved user experience of the manipulation of content by redesigning and developing web apps that allow uploading, updating and deleting information.

Selected Projects

Yaj ban - UX Designer

Aug 2020 - Sep 2020 | Mexico City

- Speeded up the acquisition of regional dresses of Mexico by designing end-to-end user experience of a website.

Bunker Pet - Front End Developer

Jan 2020 - May 2020

- Helped people to hire a pet sitter in an easier, secure and faster way by designing and developing a web app.
- Defined the risks (physical, human and logical) the project could have in order to improve the web app.

C Compiler - Software Developer

Aug 2019 - Nov 2019

- Developed a C compiler using the Racket framework Nanopass.
